Art Unit: 1724

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1:

Group I, claims 6, 7 and 12, drawn to a separation apparatus; and

Group II, claims 8-11, 13 and 14, drawn to a process for separating constituents from a liquid.

The special feature linking the two inventions is the separation apparatus, which apparatus does not provide a contribution over the prior art, as evidenced by Chen (U.S. Patent No. 4,648,976). Chen discloses a device comprising: a vertical separation column (10) having upper (20, 31) and lower (28, 35, 36) inlet ports; upper (12) and lower (16) beds having distribution nozzles (21, 27) disposed in the column; an outlet port for backwash liquid (22), and an adsorbent layer (14) disposed in the column such that a free board space is provided between the top of the adsorbent bed and the upper bed; and this is all that is required by apparatus claim 12.

In accordance with 37 CFR 1.499, Applicant is required, in response to this office action, to elect a single invention to which the claims must be restricted.

Art Unit: 1724

In addition to the above noted restriction requirement, an election of species is also required.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

(I) a vertical column with a vertical partition which divides the column into two vertical compartments;

(II) a vertical column with another vertical column located concentrically inside; and

(III) two vertical columns connected to form a "U tube" configuration.

Applicant is required, in reply to this office action, to elect a single column configuration species to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, Applicant will be entitled to consideration of claims to additional species which

Art Unit: 1724

are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, Applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
